

ARCONAS®

Innovative Leader in Seating

flyaway cluster

Designer:
Douglas Ball

Cluster units create inviting waiting areas that offer increased personal space and table surface.

- Steel structure supports the central table while ensuring strength and stability.
- Clusters can be connected to form semi-circular seating arrangements suitable for families and small groups.
- Large central table provides sufficient space for all occupants to work or relax.
- Optional power access creates a temporary workstation, and the option to plug in a laptop or mobile phone.
- Lumbar support, high backrest and thicker foam provide substantial comfort.
- Arms are optional.
- Adjustable glides offer precision levelling and can be floor fastened upon request.

- Other Flyaway models include: 2-5 seat linear units single or back to back with end and intermediate tables, and benches.

Finishes

- Die-cast aluminum components: Satin or Bright polished.
- Steel components are epoxy coated – Cloud silver.

Upholstery

- Fully upholstered seat and back.
- Upholstered pads can be removed and replaced for easy maintenance.
- Upholstery options include: vinyl, faux leather, leather and woven textiles.
